

## NEW & IMPROVED

**Rebound<sup>®</sup>** is the leading elastomeric netting used in hygiene, medical and therapeutic applications as a result of its superior stretch and recovery properties.

The new and improved Rebound<sup>®</sup> line offers lighter weight versions, custom blends and enhanced unwinding capabilities.

### Key Benefits to Manufacturers

- Rebound<sup>®</sup> elastomeric netting creates a superior stretch engine that allows products to expand while maintaining dimensional stability and compression.
- Its consistent integral joints form a web structure that provides stretch properties in one or all directions.
- Two dimensional integrity and low down time compared to those of elastic yarns.

### Key Benefits to End Users

- Tailored fit for products that demand to stay in place without restricting range of motion.
- Designed to enhance flexibility and strength while delivering exceptional comfort, shape, durability and breathability.

### Rebound<sup>®</sup> Applications

- Adult Incontinence Briefs and Underwear
- Diapers and Training Pants
- Therapeutic Wraps
- Wipes
- Gowns
- Pressure Bandages
- Elastic Disposable Nonwoven Composites

PERFORMANCE SOLUTIONS FOR A WORLD OF APPLICATIONS

# Stretch Stretch & Recover

## Why Rebound®?

- Superior hysteresis versus other stretch engine materials which means it is highly stretchable and has excellent recovery with less energy loss, improved stress relaxation and set properties.
- Tailored set, stretch, stress relaxation and recovery properties based on customer applications.
- Flexible and strong due to its web structure which allows customization of Machine Direction (MD), Cross Direction (CD) or Bi-Directional Stretch Capabilities.
- Superior breathability and fit while providing comfort and durability.
- Ideal stretch engine in composites with a variety of substrates and able to be laminated in stretched and un-stretched conditions.

## Why Conwed®?

- Total solution provider from concept to commercialization.
- More than 40 years of experience developing stretch, reinforcement, lamination, protection, separation, containment, grip and packaging capabilities.
- Global manufacturing and distribution.
- Our Sustainability Program is focused on reducing, recycling and reusing raw materials and inputs.
- Conwed® is the first netting solutions company to achieve full carbon neutral status.
